

Hot? Cool? You decide...

*Innovative technology from PPG -
one of the world's leading glassmakers.*

This new windshield will be...

HOT : vibrant reflected color that is not a "tint", so the windshield meets federal requirements, and provides haze-cutting visibility like blue-blocking glasses

COOL : offering the best protection from UV and IR solar (heat) energy of any windshield for comfort and fuel economy

DUB-approved : featured on several Chrysler DUB Edition customs displayed at SEMA 2005
