

PRODUCT: CHEMKLEEN 163A

DESCRIPTION

CHEMKLEEN 163A is a standard temperature liquid surfactant additive designed to be used in conjunction with CHEMKLEEN 163.

CHEMKLEEN 163A is a biodegradable surfactant that is designed for use in CHEMKLEEN 163 baths that are subject to unusually high amounts of oil from process parts.

CHEMKLEEN 163A is designed to increase detergency in a CHEMKLEEN 163 bath without increasing the bath's alkalinity levels.

APPLICATION

CHEMKLEEN 163A should be added to the existing CHEMKLEEN 163 bath at 3 to 5% increments of the original CHEMKLEEN 163 charge amount to enhance cleaning and wetting of the process parts.

PHYSICAL DATA

SPECIFIC GRAVITY	1.04
WEIGHT / US GALLON	8.7 # / GALLON
FLASH POINT	NONE
APPEARANCE	CLEAR LIQUID
ODOR	SLIGHT ODOR
STABILITY	STABLE
VOC	NONE

PRECAUTIONS:

Consult the most recent Material Safety Data Sheet for health and safety information relative to the handling and storage of this material.
