

## Introducing the new Prophet® II Color Analyzer

**The latest advance  
in color matching  
has arrived!**

As the collision repair industry's most advanced spectrophotometer, the new *Prophet II* color analyzer offers the exceptional ability to precisely read difficult-to-match colors and quickly find an accurate match by linking with PPG's up-to-date, color formula database. Featuring state-of-the-art optics, *Prophet II* measures a vehicle color from five reflective angles, and its user friendly, ergonomic design facilitates fast, accurate readings.

With its advanced features, there's no doubt that *Prophet II* offers *the* quick and easy way to accurately match the actual color of a vehicle.

# 3 Quick & Easy Steps

for Matching the Actual Color of your Customer's Vehicle

## Features

- **Advanced optics measure vehicle's color from five reflective angles**
- **Excellent for matching problem colors or for use when no color chip is available**
- **Compatible with PPG Access® 4.0 and PPG TouchMix®**
- **Convenient docking station for downloads, recharging and safe storage**
- **No hasp or key connection required**
- **Powered by rechargeable batteries**
- **Extended 36 month warranty**

The *Prophet® II* spectrophotometer utilizes advanced optics to measure the vehicle's actual color from five reflective angles. All it takes is a press of the button.

Simply place the *Prophet II* unit into its docking station and the color reading is automatically downloaded into a PC, where it is analyzed against formulas in the PPG *Access* color database.

With a touch of a few keys, the selected formula automatically appears on the PPG *Access* screen or is sent to the PPG *TouchMix* unit, ready for mixing.

The PPG *Access* system then automatically selects the most accurate match from a comprehensive database of more than 400,000 of the latest formulas and variances.

---

The *Prophet II* color analyzer. The fastest, easiest way to accurately match the actual color of your customers' vehicles.
