

Building Restoration Solutions

PPG knows glass, coatings and experienced contractors who can restore and renovate your building

PPG helps facility managers, contractors, architects and engineers select PPG restoration products that enhance the aesthetics and reduce operating and long-term maintenance costs.

PPG Coraflon® ADS coating for architectural metal restoration, lasts up to four times as long as conventional coatings, resulting in a significantly lower cost per year for protection and beauty.

Solarban® Low-E Coated Solar Control Glass can substantially reduce energy costs for both lighting and HVAC. With its high light transmittance, Solarban 60 Blocks more than 60% of the total solar energy, while allowing 70% of visible light to pass through.

Call 1.888.PPG.IDEA today to take advantage of PPG technology innovation to restore your building's beauty, performance and profit potential.

Building Restoration Solutions

PPG Coatings

Skyline Office Building 1

Location: Tyson's Corner, VA

Architect: WDG Architecture

Metal Restoration Contractor:

Universal Building Services Germantown, MD

Product(s): PPG Coraflon® ADS Fluoropolymer Coatings

Weathered metals and tired building components are no match for PPG technologies. PPG has pioneered the high durability coatings industry – offering beautification and protection with unparalleled products and lasting results.

Coraflon® ADS

Ideal for monumental building restoration, Coraflon ADS lasts longer than other field-applied coatings, allowing it to be backed by warranties in many circumstances. Coraflon ADS is designed for use on structurally sound surfaces, including architectural metals, curtain walls, roofs, aluminum windows, doors, handrails and stairs. Coraflon ADS is VOC compliant throughout North America.

Duranar® ADS

Forty years of proven performance on high rise buildings, architectural metal and accents has earned Duranar the distinction of being the most known and trusted brand of fluoropolymer coatings. Duranar ADS can restore architectural metals with legendary PPG performance.
