TouchMix Paint Manager

# TouchMix

## Paint Manager

*TouchMix® Paint Manager™* is the state-of-the-art tool for monitoring and managing the productivity and profitability of a paint operation, no matter the size of your business.

With its full-featured paint mixing tracking features, this advanced tool provides instant access to all the information required to make informed decisions on job costs, material usage, mixing efficiency, inventory and much more. Add in the accuracy of touch-screen formula retrieval and mixing to help technicians eliminate errors and avoid waste, and there's no doubt that *TouchMix Paint Manager* is the ideal tool for managers and technicians alike.

# TouchMix® Paint Manager™

*For the manager who wants to be in the know.*

## FEATURES FOR MANAGEMENT:

- **Production screen displays estimate details such as RO, customer and repair vehicle**
- **Full reporting options for job costing invoices and summaries**
- **Cost per refinish hour with gross profit margins**
- **Repair order profit margins can display multiple jobs by painter**
- **Mixing accuracy reports**
- **Security options—for management and technicians across all functions**
- **Custom pricing capabilities**
- **Mixed inventory can be tracked for multiple repair orders**
- **VOC usage tracking**
- **Sundry kits can be added to jobs so no cost is missed**

The features of *TouchMix Paint Manager* pave the way for better management of paint products, employee production and more. It's a great tool for effectively utilizing material usage and productivity reports to increase the profitability of the paint operation.

As a Microsoft Windows® software application, *TouchMix* easy-to-follow menus make navigation simple, minimizing the need for training. For users without touch-screen hardware, *TouchMix* software is flexible enough that it can run as a mouse-driven Windows® application. Simply point and click.

## FEATURES FOR TECHNICIANS:

- **Intuitive touch screens**
- **Access to the latest product technical information (Acrobat PDFs)**
- **Minimum mix button—calculates smallest amount to mix without jeopardizing color match**
- **Visualizes pouring accuracy**
- **Recalculates over pours**
- **Volume estimator—selects quantity based on the size and type of vehicle**
- **Favorites feature—select products and ratios customized to your needs**
