

Maintenance Products

Product	Form	Composition	Concentration	pH of working bath	Temperature Range	COMMENTS
Chemfil Buffer	Liq	Caustic	Varies	11.0	Ambient	Chemfil Buffer is a mild Buffering material formulated for use in conjunction with iron phosphate, zinc phosphate and chromic acid rinse materials
Chembar	Liq	Wax	As delivered	7.0	Ambient	Chembar is a water soluble wax material formulated for application on body in white metals prior to solder or welding operations. CHEMBAR eliminates spatter adherence associated with these operations and can be readily removed from the surface in the subsequent solder grind washer or the cleaning and rinse stages of the phosphate system. CHEMBAR is not detrimental to phosphate operations. CHEMBAR is used as received and can be applied with spray equipment or a hand brush. CHEMBAR has no flash point, is not toxic and is completely rinseable with water
Foam Depressor 304CK	Liq	N/A	As needed per technical data sheet	N/A	Ambient	Foam Depressor 304CK is a superior general purpose defoamer suitable for use on alkaline spray wash cleaning stages prior to phosphating. It is unique in that it does not interfere with the phosphating process and is therefore particularly useful for depressing foam created from the use of water based pre-wipe materials and the new liquid pre-phosphate cleaners.
Floorkleen 37	Liq	Potassium Hydroxide	10 to 35%	13.0	Ambient	Floorkleen 37 is a highly alkaline highly effective general purpose cleaner recommended for use in automatic floor scrubbing machines. It also yields excellent results by mopping at various concentrations dependent on type and amount of soils. Is ideal for general purpose cleaning such as removing unpolymerized paint or soils.
Heat Exchanger Cleaner	Liq	Phosphoric Acid	As delivered or cut	1.5 - 2.5	Ambient	Heat Exchanger Cleaner is a liquid phosphoric acid base material which readily dissolves sludge that builds up in Plate & Frame Heat Exchangers. It is compatible with zinc phosphate materials and is not deleterious to equipment and less hazardous than hydrochloric acid based materials.
Ovenkleen 37	Liq	Potassium Hydroxide	50% x volume	14.0	Ambient	Ovenkleen 37 is a concentrated alkaline oven cleaner and degreaser extremely useful for dissolving carbon and baked on E-Coat paint residue. Ovenkleen 37 is specially formulated to be non-aggressive on aluminum alloys thus making it suitable for all oven cleaning applications.
Rustarest 260	Liq	Blend	See TDS	N/A	Ambient	Rustarest 260 is a specialty blend of solvents, emulsifiers and petroleum based rust preventatives for the temporary corrosion protection of ferrous metals. It can be used with water for the preparation of rust preventative emulsions on ferrous metals.
Stage Cleaner 247	Liq	Sodium Hydroxide	10 to 15%	14.0	180°F	Stage Cleaner 247 is a buff colored alkaline material having excellent sequestering properties and will dissolve many types of soil and rust. It is designed for removing scales resulting from insoluble soaps, calcium hardness from risers heat coils, and nozzles of the spray washer. It will also remove built up grease and oil from washer walls, tanks, and risers.
