

Poultry

The Accu-Tab® system by PPG Industries combines uniquely designed patented chlorinators with slow release 68% calcium hypochlorite to provide one complete system for tablet chlorination. Meet HACCP requirements and improve the effectiveness of your plant's chlorination system by choosing the Accu-Tab system to replace your traditional bleach system.

Why choose the Accu-Tab system?

- More reliable chlorination control and delivery
- Improved bacteria reduction
- Chlorine assay integrity
- Reduced corrosive atmosphere
- No gas releases or chlorine spills for improved personnel safety

The Accu-Tab system is being used by companies throughout the U.S. for various poultry applications:

- Chillers
- Evisceration Lines
- Inside/Outside Bird Washers
- Cut-up and Deboning
- Tote Washers
- Continuous Belt Washing
- Well Water
- Wastewater

The Accu-Tab system is certified:

- NSF International White Book™ listed as NSF Registered Proprietary Substances and Non-Food Compounds for D2, G4, G5, G7 and Q4
- FDA acceptable for use as a sanitizing solution per 21CFR 178.1010
- Certified Kosher for Passover and year-round use by the Orthodox Union

The Accu-Tab chlorination systems for the poultry industry are customized for each location and installed by Southeastern Systems (SES). SES is the exclusive poultry specialist for PPG Industries.
